

"Must See Products" at the ICCFA Convention

When it comes to attending the ICCFA trade show, funeral directors may find it overwhelming to see all of the products that the industry has to offer. Here we've compiled a list consisting of products that are designed to help you stay in touch with the industry offerings. Please visit these booths to learn more about these products.

Custom Fingerprint Keepsakes

Memories live forever in the heart. This heirloom keepsake, custom designed and cast in sterling, 14kt and 18kt gold, provides a tangible and uniquely beautiful object in the form of jewelry. Addition of genuine birthstones and diamonds are available. Engraving is free.

Securing the fingerprint impression takes only moments and provides additional income with minimal effort.

Ground Protection Mats

AlturnaMATS is the manufacturer of the original ground protection mat. Since 1994, AlturnaMATS has been manufacturing ground protection mats to help eliminate ground restoration projects and to keep equipment from getting stuck in the mud. We now have multiple styles of ground protection mats, making AlturnaMATS your single source for ground protection. Each style of our mats is guaranteed for six full years from the purchase date. AlturnaMATS also offers a new line of Outrigger Pads available in many sizes with a lifetime guarantee.

Memorial Portrait Production System

Enduring Images announces a first-of-its-kind desktop memorial portrait production system enabling funeral homes and cemetery operators to increase profit and improve customer value. This easy-to-use digital ceramic system prints an unprecedented 1200 dpi image resolution and does so with a simple mouse click. Unlock the very attractive margins in porcelain photos! The revenue generated by selling just 1 porcelain photo is greater than the monthly lease payment!

Undersea Tribute To Life

The Neptune Memorial Reef is a resting place for those who choose cremation and want to be memorialized in an awe-inspiring underwater setting. Located off the Miami Coast, this environmentally friendly sanctuary is the first and only one in existence for those who prefer cremation and believe in preserving our planet's resources. This lost city beneath the sea covers 16 acres of the ocean floor and can provide sanctuary for over 100,000 individuals. The Neptune Memorial Reef is a new choice for individuals and families to be honored and remembered in a way that reaffirms life after life.

Water Resolution™

Water Resolution™. An environmentally responsible alternative to cremation and burial.

Water Resolution™, from BioSAFE Engineering, uses alkaline hydrolysis to accelerate the natural decomposition process of burial. The result is pure ash bone shadow which can be returned to the family, and a natural contaminant-free by-product which is returned to the ecosystem for recycling, as nature intended.
